EXPERIENCE

■ June 2023 - PRESENT

Rumango Software and Consulting Pvt Ltd, Bangalore Karnataka

Associate Software Developer

- **UI/UX Implementation:** Designed and implemented responsive Angular interfaces to improve usability and streamline customer workflows.
- **Reusable Component Development:** Built modular and reusable UI components to support faster development and maintain consistent design across the application.
- **Backend Integration:** Collaborated with backend teams to ensure smooth API integration and efficient data handling.
- **Code Quality & Best Practices:** Led code reviews and enforced best practices to maintain clean, maintainable, and reliable code.
- **UX Collaboration:** Partnered with designers to convert UI/UX specifications into functional and intuitive user interfaces.
- **Mentorship & Team Support:** Guided and assisted interns and junior developers, fostering skill development and improving team efficiency.

PROFESSIONAL PROJECTS

■ 1. ICUST BANK

- **Customer Onboarding:** Developed and implemented a seamless onboarding process for new customers, enhancing user experience and reducing onboarding time.
- **Loan Origination:** Worked on automating the loan origination process, including loan application submission, verification, and approval workflows.
- **Internet Banking:** Contributed to building and optimizing internet banking features for customers to manage their accounts, transfer funds, view transactions securely and etc.
- **System Maintenance:** Participated in the maintenance and upgrade of banking systems to ensure uptime, compliance with regulations, and the integration of new features.
- **Agent Banking:** Developed features to support agent banking services, enabling banking transactions through authorized agents, improving financial inclusion.
- **KYC (Know Your Customer):** Implemented KYC verification systems to ensure regulatory compliance and improve the accuracy of customer information.
- **Customer 360 Dashboard:** Developed a comprehensive Customer 360 Dashboard to provide a consolidated view of customer information, including transaction history, account balances, and loan details, enhancing customer insights for support teams and sales.
- **Task Summary:** KYC Verification Records, Onboarding Records, Loan Origination Records, Account Origination Records

2. Car Dealer Application

The Car Dealer Application allows admins, dealer managers, and management to access the platform, manage inventory, and oversee operations. Additionally, users can raise loan requests directly through the website for vehicle purchases.

PERSONAL PROJECTS

- **Netflix Clone** – Built using HTML, CSS, JavaScript, PHP, and MySQL (phpMyAdmin) for backend and database.
- **Hotstar Clone** – Designed a responsive UI with category-based video layout using HTML, CSS, and JavaScript.
- **Portfolio Website** – Developed a personal website to showcase skills and projects using HTML, CSS, and JavaScript.
